

Your Colombian books, ready for whoever reviews them.

We run the bookkeeping and tax compliance of your Colombian operation, with an assigned team that knows your business from the inside. And if your parent reports under a different framework, we deliver the local figures reconciled with the corporate ones.

Two sets of books, reconciled

Colombian accounting

- Bookkeeping, closings and financial statements under Colombian standards. What the authorities expect to see.

Your parent's framework

- IFRS, US GAAP or your group's framework. We map the charts of accounts and leave every difference explained, line by line.

Switching providers: an orderly handover

Your books are current

We fit into your ERP and take over live.

Coming from another provider

We receive it as it stands, without breaking what works.

Behind, or changing ERP

Bringing the books current and parameterizing from scratch.

What you receive every month

- Financial statements: position and income statement, on the agreed schedule.
- Ledgers and supporting detail behind every figure.
- Tax compliance with the DIAN and the Secretaría de Hacienda.
- Reporting built to fit: your cost centers and your group's formats and calendar.
